

# Telepresence

Now you can bring your team together from wherever your business takes them.

Telepresence is a flexible, scalable and secure on demand video solution that uses TPaaS, (Telepresence-as-a-Service), an all-in-one cloud-based video collaboration tool. With Telepresence, your team members are able to join a secure Virtual Meeting Room from anywhere, at any time, using their laptop, tablet or smartphone.

## All-in-one video collaboration

- Speed up decision making
- Connect anywhere, anytime from any Internet-enabled device
- Connect up to six sites in HD point-to-point video and multipoint calling
- Protect your critical business data by connecting securely to virtual meeting rooms
- Share content, including slide presentations, documents, web pages and more
- Arrange screen layouts to customize views of participants and content
- Scalable to meet the communication needs of any size business

## Video conference from wherever your employees are

Not only can your employees see and talk to each other thanks to high quality video and audio, they can easily share data. Plus, it's easy to use — no IT expertise is needed, it's easy to set up and install, and you don't need any extra equipment to get started.

Whether you want to bring together small groups or include several team members spread out across different locations, it's possible with Telepresence.

Cloud-based collaboration has the power to drive innovation and significant business results. To learn more or order our leading video conferencing solution today, call **1 888 423-2333** or connect with us by email at **[sales@nwtel.ca](mailto:sales@nwtel.ca)**.
